

Present Status of Atomic Physics at Lanzhou

Xinwen Ma
IMP, Lanzhou, China

- The ongoing project at ECR ion source
- The X-ray spectrometer at HIRFL
- The electron cooler storage ring at Lanzhou

* The talk was not presented on the workshop due a problem of the author's passport.

The Ongoing Project at ECR Ion Source

Opportunities for low energy highly charged ion studies

- Two sets of ECR ion sources for low energy experiment
- One super conducting ECR ion source is under construction
- One electron beam ion source (EBIS) will be built

Physics goals at the ion sources

- Ion-atom, molecules, and cluster collisions
- Electron-ion collisions
- Ion-surface interactions
- Diagnostic of plasma properties in the ion source

Table 1 Ions, charge-states and maximum ion current provided by the present ECRsources and the on-building super conducting ion source at IMP in Lanzhou. For collision experiments, the charge states may be higher than the values listed in the table because of very low beam intensities needed.

Ions and charge states	maximum ion current (μA)	
	Present ion sources	SC ion source
Ar ¹¹⁺	185	350
Ar ¹⁶⁺	1	30
Kr ²⁰⁺	25	80
Kr ²⁵⁺	*	40
Kr ²⁸⁺	*	6
Xe ²⁶⁺	50	90
Xe ³⁰⁺	4	25
Xe ³⁵⁺	*	4.5
Ca ¹¹⁺	140	300
Ca ¹⁶⁺	*	40
Ni ¹¹⁺	*	150
Ni ¹⁷⁺	*	40
U ³¹⁺	10	40
U ⁴²⁺	*	10
U ⁴⁸⁺	*	4

Experimental setup at ECR platform

Experimental setup for ion-atom, molecules, and clusters collisions at ECR ion source

The X-ray spectrometer at HIRFL

Planned Physics program

- Precision X-ray spectroscopy: Lamb shift measurement of medium heavy ions
- Few-electron Ion-atom, molecule, and cluster collisions: innershell processes.
- Ion-crystal interaction: ion channeling , resonant coherent excitation processes
- Ion-bulk interactions: energy loss and charge state distribution (material science group)

New layout of experimental terminals at Heavy Ion Research Facility in Lanzhou

TR6 :
 Mass= 12.0000 Charge= 6.0 Energy= 11.990 MeV/u Emittances= 10.000 10.000 pi mm*mrad

MIRKO - Version 6.10-W vom 23.10.2000 Date: 25.04.2001 - Time: 18:16:29
 psvv1.501.1 (pmod.1)
